Black Adda  
PO Box 192  
Sherwood QLD 4075

Dear Mr Scott,

**Re: Test results for the 'Black Adda Ladder Adapter'**

Thank you for the opportunity to perform the required testing on the Black Adda Ladder Adapter.

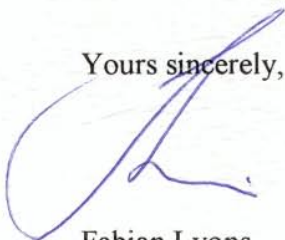

We are pleased to advise that the assembly withstood in excess of seven times the required load of 120kg as specified by yourself.

With a maximum equal loading capacity of 8.57 kN on each leg of the ladder the assemblies would be theoretically capable of withstanding nearly 15, 120kg workmen standing on the ladder at any one time. As you would appreciate this is far in excess to the normal design criteria of the ladder assembly itself.

The Black Adda Ladder Adapter is well engineered for the application intended and failure of this assembly would not be expected if used in accordance with design guidelines.

Once again, thank you very much for the opportunity to be of service and we look forward to being of assistance to your organisation for future activities.

Yours sincerely,

Fabian Lyons
